

PET Tiger

Payroll Employee Tracking Face ID

PET Tiger's Face ID is the ideal solution for all operation types.

The all new powerful facial recognition terminal provides solid identity verification through its contactless biometrics technology, recognizing a face in mere seconds.

Loaded with Face Biobridge VX 8.0, the latest face recognition algorithms, detect facial features during enrollment. Verification is made quicker and more accurate with the high resolution camera and infrared feature. Face detection is possible even under minimal light sources.

- Time and Attendance
- Prevent Buddy Punching
- Face recognition within seconds
- Real Time
- Picture in the field
- Bio Documentation in real time with GPS

**If you are looking into biometrics we have other options like finger scanner.*

Out in the field you can use your smart device to take advantage of face identification via picture verification module. Take a picture of the employee at time in and time out. Receive the pictures in real time as well as the time card coordinates. Management will receive notification on a report or a map format to illustrate where employees are and what is their productivity.
